# MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XX

OTTAWA, NOVEMBER, 1945

No. 11

DOMINION STATISTICIAN: HERBERT MARSHALL, B.A., F.S.S. CHIEF, BUSINESS STATISTICS BRANCH: SYDNEY B. SMITH, M.A.

#### ECONOMIC CONDITIONS IN OCTOBER

The average of six factors indicating the trend of economic conditions showed a slight increase in October over the preceding month. A decline was shown in the index of the physical volume of business while other strategic factors moved in an upward direction. Speculative factors, including common stock prices and the number of shares traded on the Stock Exchanges, showed increases in October. The index of common stock prices rose to a new high point since the summer of 1937. Prices of commodities at wholesale and longterm Dominion bonds were not greatly changed in the month under review. The sum of four classes of deposits rose from \$5,229 million at the beginning of the preceding month to \$5,269 million. The advance in notice and demand deposits exceeded the decline in Dominion and Provincial balances. Notice deposits rose to a new high point in history. It was announced on November 12 that final returns from sales in the Ninth Victory Loan Campaign would amount to from \$1.9 billion to \$2 billion. The reported sales up to the closing day of the campaign amounted to \$1,808,586,000, consisting of sales to individuals amounting to \$1,031,786,000 and sales to special names totalling \$776.8 million. Individual applications totalled 2,547,000 compared with 2,525,000 in the Eighth Loan.

The weekly average of prices of industrial materials was 98·1 during October compared with 98·7 in the preceding month. Canadian farm products, on the other hand, showed an increase, the standing in the week ended the 25th of October having been 105·8 against 103·5, the index for the month of September. The cost of living receded from 119·9 on September 1 to 119·7 on the same date of the month under review. The standing in October, 1944 was 118·6. The indexes of wholesale prices in the United States recently showed marked advances. Several commodities, notably grains, have attained levels unequalled in 20 years or more. The Dow Jones futures index recently stood at 106·4, being 64·5 p.c. higher than in the pre-war year of 1939 high. A non-official weighted wholesale price index was recently 14·6 p.c. greater than the average high point of the pre-war period from 1933 to 1939.

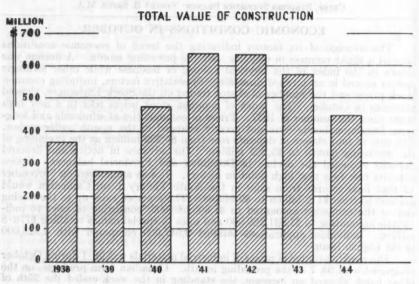

The new business obtained by the construction industry was \$29.4 million in October compared with \$42.0 million in the preceding month, the adjusted index dropping from 156 to 120. The contracts placed in October of last year amounted to \$25.9 million. A bill was recently introduced in the House of Commons to incorporate the Central Mortgage and Housing Corporation with a capital of \$25 million, the main purpose of which is to place the administration of the National Housing Act under a corporation. The aim of the mortgage corporation is that its existence will tend to avoid refusal by lending institutions to renew mortgages because of their shortage of cash. The loan and trust companies have the backing of the central institution to assist in their liquidity position. Lenders will have some assurance of mortgaged funds being available on national and local bases.

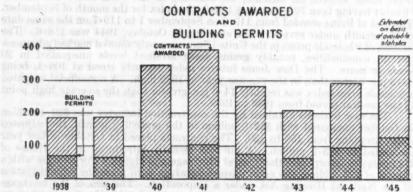

The index of the prices of building materials reached a high level of 128·0 in April of the present year and has recently receded to a somewhat lower position. The index was recently 35·7 p.c. greater than in August, 1939, just before the outbreak of war and it is not far from being double the 1933 low point of 78·3.

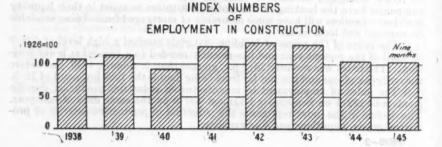

The index of employment in manufacturing industries producing durable goods was 122·1 on September 1 against 150·5 on the same date of last year. The decline in the index represents the reduction in productive activity of producers' goods, munitions and war supplies.

### THE CONSTRUCTION INDUSTRY

1938-1945

The level of production in Canada is dependent upon expenditures of different descriptions. The export trade is one of the important items in this connection, the amount of the exports being dependent upon the decision of people living in other countries. Exports during the first nine months of 1945 amounted to \$2,557 million against \$2,577 million in the same period of 1944. Owing to the termination of Mutual Aid and the end of the war, Canadian exports have recently shown decline. As imports have dropped this year to a greater extent that exports, the active balance of trade continued strong. Exclusive of non-monetary gold, the balance was \$1,369 million in the first nine months against \$1,247 million in the same period of 1944. Owing to the decline in gold mining operations, the net exports of non-monetary gold receded from \$85.3 million in the first nine months of 1944 to \$72.3 million in the same period of 1945, a decline of 15 p.c.

The adjusted index of retail sales was 186·1 in September compared with 189·8 in the preceding month. The index in the same month of last year was 170·5, the advance having been about 9 p.c. Country store sales increased 4 p.c. in September as compared with the same month one year ago but were 6 p.c. lower than in August of this year. The gain in wholesale sales during the first

eight months was 10.9 p.c. over the same period of 1944.

The ordinary expenditures of the Dominion Government during the first seven months of the present fiscal year totalled more than \$577 million compared with \$381 million in the same period of 1944. The grand total expenditures, owing mainly to the decline in disbursements for war purposes, receded from \$3,030 million to \$2,495 million. The revenues showed a decline of about 6½ p.c. to \$1,540 million in the same comparison.

**Purchasing Power** 

An index of aggregate payrolls on the base of June 1, 1941 equalling one hundred was 140.8 as of September 1 compared with 149.6 on the same date last year. The indexes from January 1 to September 1 have been consistently lower in the present year than in 1944. The gap was nearly 9 points on September 1. The decline in aggregate payrolls was much greater in the manufacturing group than in the eight main branches covered by the survey of employment and payrolls. During the war, there were especially noteworthy advances in employment and payrolls in factories, in which the rate of expansion in the period of observation has been decidedly greater than in the non-manufacturing industries.

Largely as a result of the cancellation of war contracts following the termination of hostilities, employment in manufacturing at September 1 showed a

further important contraction of a contra-seasonal character.

Dividend payments during the ten months, according to non-official computations, were \$219.9 million compared with \$215.3 million in the same period of 1944, an increase of 2.1 p.c. An index of dividend payments was 140.0 in October against 129.9 in the same month of last year. Interest payments on the public debt by the Dominion Government were \$204 million in the first seven months of the present fiscal year against \$154 million in the same period of 1944.

Production

Prairie Province deliveries of wheat amounted to 138 million bushels between August 1 and November 8 against 152·9 million in the same period of last year. While unprecedented demand will continue for a time and export movement this season has been exceptionally heavy in Canadian grains, reference to the record in approximately the past two decades should be topical for it shows the wide fluctuations there have been in exports.

A marked gain was shown in livestock slaughterings in October over the preceding month. Slaughterings of cattle were 284,000 head against 241,000 in September. The marketings of hogs rose from 299,000 head to 455,000, the index rising from 132 to 155. Recession was shown in the production of cheese

pent

and butter during the month, the index of dairy production dropping about 6 The output of cheese was 17.6 million pounds against nearly points to 120.4. 24 million while the output of creamery butter receded from 30.4 million pounds to 24.0 million. A marked decline was shown in the export of canned salmon from the high level of the preceding month. Exports of domestic meats during the first nine months showed a gain over the same period of 1944. Outward shipments totalled 115.9 million pounds against 68.9 million in the same period of 1944, an increase of 68.5 p.c. The exports of bacon, on the other hand, amounted to 359.6 million pounds in the first nine months of 1945, a decline of

39.5 p.c. from the same period of the preceding year.

The United Nations Relief and Rehabilitation Administration expects to be out of Europe after the harvest of 1946. This is contingent upon \$2,250 million, the 1946 budget being forthcoming from the United Nations, for the organization will have exhausted its present funds by the end of the year. million tons of food, clothing and rehabilitation equipment and supplies had been sent to Europe by the organization from April until the end of October. Holland, Poland and Czechoslovakia are in urgent need of food and other supplies. The Director General of the United Nations Food and Agricultural Organization recently recommended an immediate preparation for an international commodity pooling device to stabilize prices and supplies of a world surplus of wheat anticipated in the next two or three years. He made a strong plea for world control of food and farm products to provide a level of production guaranteeing an adequate price for the farmer and ample supplies for a world now two-thirds undernourished.

The production of newsprint rose to a high point in October, the total having been 310,975 tons compared with 269,963 in the preceding month. Increases were also shown in the exports of wood pulp, planks and boards, and The forestry index rose from 123.8 in September to 133.2 in the month under review. Both production and shipments of newsprint by Canadian mills expanded during October to the highest level in about four years, as well as being in excess of the October, 1939, comparisons. Canadian shipments last month amounted to 308,090 tons compared with 277,918 tons in the preceding month, and 262,998 tons in October last year. Compared with October, 1939, there was an increase of 18,830 tons or 6.5 p.c. The ratio of production to capacity was 82.8 p.c., being at the highest level for any one month since January, 1942. The apparent newsprint consumption in the United States was 338,484 tons for October against 304,706 tons in the preceding month. The figure for October was the highest since December, 1942.

Central electric stations produced 3,079 million kilowatt hours in September this year, a decline of 6 p.c. from the same month of 1944 when the total was 3,235 million kilowatt hours. The total produced during the first nine months of the present year was 30,266 million kilowatt hours, compared with 30,188

million in the corresponding period of last year.

Manufacturing production was at a considerably lower level in October than in the preceding month. Improvement, however, was shown in the operations of the cotton textile industry. The raw cotton used was 14.5 million pounds against 12.3 million in the preceding month. Bale openings for the first ten months of this year amounted to 309,539 as compared with 320,878 in the corresponding period of 1944.

The gross receipts of the Canadian Pacific Railway during the first ten months were \$271.4 million. This compares with \$272.4 million for the same period of last year, being a decline of 0.34 p.c. The gross revenue of the Canadian National Railway during the first eight months was \$289.3 million against

\$290.9 million in the same period of the preceding year.

OTTAWA, NOVEMBRE 1945

No 11

STATISTICIEN DU DOMINION: HERBERT MARSHALL, B.A., F.S.S. CHEF, BRANCHE DES STATISTIQUES ECONOMIQUES: SYDNEY B. SMITH, M.A.

#### SITUATION ÉCONOMIQUE EN OCTOBRE

La moyenne des six facteurs tracant l'orientation de la situation économique augmente légèrement en octobre comparativement au mois précédent. L'indice du volume physique des affaires décline, tandis que les autres facteurs importants avancent. Les facteurs spéculatifs, comprenant le cours des actions ordinaires et les transactions boursières, accusent des gains en octobre. L'indice des actions ordinaires touche un nouveau sommet depuis l'été de 1937. Les prix de gros et les obligations à long terme du Dominion ne changent pas beaucoup en La somme des quatre catégories de depôts passe de \$5,229,000,000 au début du mois précédent à \$5,269,000,000. L'augmentation des dépôts à terme et des dépôts à demande excède la diminution des soldes du Dominion et des provinces. Les dépôts à terme atteignent une nouvelle cime dans l'histoire. Il a été annoncé le 12 novembre que les ventes au cours de la campagne du neuvième emprunt de la Victoire varieront entre \$1,900,000,000 et \$2,000,000,000. Le dernier jour de la campagne les ventes s'élevaient à \$1,808,586,000, soit \$1,031,786 pour les particuliers et \$776,800,000 pour les noms spéciaux. Les souscriptions des particuliers s'établissent à 2,547,000 contre 2,525,000 lors du huitième emprunt.

La moyenne hebdomadaire des prix des matières premières industrielles est de 98·1 en octobre, à rapprocher de 98·7 le mois précédent. Par contre, les produits de la ferme canadienne laissent voir une augmentation, l'indice étant de 105·8 la semaine terminée le 25 octobre contre 103·5 en septembre. L'indice du coût de la vie rétrograde de 119·9 le 1er septembre à 119·7 la même date du mois observé; il se plaçait à 118·6 en octobre 1944. Les indices des prix de gros aux Etats-Unis ont récemment fait des gains marqués. Plusieurs denrées, notamment les céréales, ont atteint des niveaux inégalés depuis vingt ans ou plus. L'indice des livraisons à terme de Dow Jones s'est récemment établi à 106·4, soit 64·5 p.c. de plus que la cime atteinte avant la guerre, en 1939. Un indice pondéré officieux des prix de gros était dernièrement de 14·6 p.c. plus élevé que

la moyenne de la période d'avant -guerre de 1933 à 1939.

Les nouvelles entreprises dans l'industrie de la construction se chiffrent par \$29,400,000 en octobre contre \$42,000,000 le mois précédent, et l'indice passe de 156 à 120. Les contrats placés en octobre l'an dernier étaient de \$25,900,000. Un projet de loi a récemment été déposé à la Chambre des Communes pour constituer en corporation la Société centrale d'hypothèques et de logement avec un capital de \$25,000,000, dont le principal objet est de confier à une société l'administration de la loi nationale sur l'habitation. L'existence de la Société d'hypothèques tendra à éviter que les institutions prêteuses ne refusent de renouveler des hypothèques par suite de leur manque de fonds. Les compagnies de prêt et de fiducie ont l'appui des institutions centrales pour leur aider à disposer d'actif liquide. Les prêteurs pourront compter jusqu'à un certain point sur des fonds hypothécaires disponibles sur une base nationale ou locale.

L'indice des prix des matériaux de construction a atteint un sommet de 128·0 en avril cette année, mais il a dernièrement passé à un niveau un peu plus bas. L'indice a récemment été de 35·7 p.c. supérieur à ce qu'il était en août 1939, avant le déclenchement de la guerre, et il n'est pas loin du double du bas

niveau de 78.3 en 1933.

L'indice de l'emploiement dans les fabriques d'articles durables s'établit à 122·1 le 1er septembre contre 150·5 la même date de l'an dernier. Le déclin de l'indice reflète la diminution de la fabrication d'articles de production, de munitions et de fournitures de guerre.

Le niveau de la production au Canada repose sur les dépenses de différentes natures. Le commerce d'exportation est l'un des plus importants dans ce domaine, et le volume des exportations dépend de la décision des individus qui vivent dans les autres pays. Les exportations durant les neuf premiers mois de 1945 s'élèvent à \$2,557,000,000, au regard de \$2,577,000,000 la même période de 1944. L'aide mutuelle et la guerre ayant pris fin, les exportations canadiennes ont récemment décliné. Comme les importations cette année ont beaucoup plus diminué que les exportations, la balance active du commerce continue d'être forte. A l'exclusion de l'or non monétaire, la balance est de \$1,369,000,000 les neuf premiers mois contre \$1,247,000,000 la même période de 1944. En raison du ralentissement des opérations des mines d'or, les exportations nettes d'or non monétaire passent de \$85,300,000 les neuf premiers mois de 1944 à \$72,300,000 la même période de 1945, déclin de 15 p.c.

L'indice ajusté des ventes de détail se place à 186·1 en septembre comparativement à 189.8 le mois précédent. L'indice s'établissait à 170.5 le même mois de l'an dernier, le gain étant d'environ 9 p.c. cette année. Les ventes des magasins généraux ruraux augmentent de 4 p.c. en septembre au regard du même mois de l'an dernier, mais elles diminuent de 6 p.c. par rapport à août Les ventes de gros augmentent de 10.9 p.c. les huit premiers mois

de cette année comparativement à la même période de 1944.

Les dépenses ordinaires du gouvernement fédéral au cours des sept premiers mois de l'année financière courante s'élèvent à plus de \$577,000,000, à rapprocher de \$381,000,000 la même période de 1944. Le grand total des dépenses, en raison surtout du déclin des déboursés pour fins de guerre, passe de \$3,030,000,000 à \$2,495,000,000. Les recettes déclinent d'environ 6½ p.c. dans le même ordre de comparaison et s'établissent à \$1,540,000,000.

Pouvoir d'achat

L'indice des bordereaux de paye (sur la base 100 le 1er juin 1941) se place à 140.8 le 1er septembre contre 149.6 la même date de l'an dernier. Les indices du 1er janvier au 1er septembre cette année ont été constamment plus faibles que l'an dernier. L'écart est près de neuf points le 1er septembre. Le déclin des bordereaux de paye est beaucoup plus considérable dans le groupe des manufactures que dans les huit principales branches comprises dans le relevé de l'emploiement et des bordereaux de paye. Durant la guerre l'augmentation du nombre d'employés et des salaires dans les manufactures a été particulièrement remarquable; le taux de l'augmentation au cours de la période observée a été nettement plus grand que dans les industries non manufacturières.

L'emploiement dans les manufactures accuse au 1er septembre une nouvelle contraction importante d'un caractère saisonnier, par suite surtout de l'annula-

tion des contrats de guerre une fois les hostilités terminées.

D'après des calculs officieux, les paiements de dividendes au cours des dix mois se chiffrent par \$219,900,000 contre \$215,300,000 la même période de 1944, augmentation de 2·1 p.c. L'indice des paiements de dividendes se place à 140.0 en octobre comparativement à 129.9 le même mois de l'an dernier. Les paiements d'interêts sur la dette publique par le gouvernement fédéral s'élèvent à \$204,000,000 les sept premiers mois de l'année financière courante, à rapprocher de \$154,000,000 la même période de 1944.

Production

Les arrivages de blé dans les Provinces des Prairies s'établissent à 138,000,000 de boisseaux du 1er août au 8 novembre, au regard de 152,900,000 la même période de l'an dernier. Il est vrai que la demande continuera d'être sans précédent pendant un certain temps et que les exportations de céréales canadiennes ont été exceptionnellement considérables au cours de cette saison, mais il serait d'actualité de s'en référer aux statistiques des deux dernières décennies car elles indiquent les grandes fluctuations des exportations.

Les abatages de bestiaux augmentent d'une façon marquée en octobre comparativement au mois précédent. Les abatages de bêtes à cornes s'élèvent à

284,000 têtes contre 241,000 en septembre. Les arrivages de porcs passent de 299,000 têtes à 455,000 et l'indice avance de 132 à 155. La production de fromage et de beurre diminue durant le mois; l'indice de la production laitière perd environ six points et s'établit à 120·4. La production de fromage est de 17,600,000 livres contre 24,000,000 environ, tandis que la production de beurre de crémerie diminue de 30,400,000 livres à 24,000,000. Les exportations de saumon en boîte font un déclin marqué au regard du niveau élevé du mois précédent. Les exportations de viandes canadiennes pendant les neuf premiers mois augmentent par rapport à la même période de 1944. Les expéditions s'élèvent à 115,900,000 livres contre 68,900,000 la même période de 1944, augmentation de 68·5 p.c. Par ailleurs, les exportations de bacon s'établissent à 359,600,000 livres les neuf premiers mois de 1945, diminution de 39·5 p.c. comparativement à la même période de l'année précédente.

Les stocks d'aliments dans les entrepôts le 1er novembre, sauf de très rares exceptions, sont bien inférieurs à ce qu'ils étaient il y a un an; le déclin est très prononcé en certains cas. Les stocks de viandes sont cependant stables comparativement à l'an dernier, mais les stocks d'œufs déclinent. Les approvisionnements de volaille diminuent de 14,000,000 de livres à 9,000,000; ceux de pommes de terre, de 76,000,000 de tonnes à 23,000,000; les stocks d'autres légumes accusent également des déclins importants.

La production de papier à journal atteint une nouvelle cime en octobre, soit 310,975 tonnes contre 269,963 le mois précédent. De même, les exportations de pulpe de bois, de madriers et planches et de bardeaux laissent voir des augmentations. L'indice de la production forestière passe de 123·8 en septembre à 133·2 en octobre. La production ainsi que les expéditions de papier à journal par les moulins canadiens touchent en octobre leur niveau le plus élevé depuis environ quatre ans; elles sont en outre supérieures à ce qu'elles ont été en octobre 1939. Les expéditions canadiennes le mois dernier s'établissent à 208,090 tonnes, à rapprocher de 277,918 le mois précédent et 262,998 en octobre l'an dernier. Au regard d'octobre 1939 il y a une augmentation de 18,830 tonnes ou de 6·5 p.c. Le rapport entre la production et le rendement potentiel est de 82·8 p.c.; ce niveau est le plus élevé en tout mois depuis janvier 1942. La consommation apparente de papier à journal aux Etats-Unis se place à 338,484 tonnes en octobre, à rapprocher de 304,706 le mois précédent. La consommation en octobre est la plus considérable depuis décembre 1942.

Les centrales électriques produisent 3,079,000,000 de kilowatt-heures en septembre cette année, déclin de 6 p.c. par rapport à la production de 3,235,000,-000 de kilowatt-heures le même mois de 1944. La production des neuf premiers mois de l'année courante s'élève à 30,266,000,000 de kilowatt-heures, comparativement à 30,188,000,000 la période correspondante de l'an dernier.

La production manufacturière en octobre est bien inférieure à ce qu'elle a été le mois précédent. Il y a toutefois une amélioration dans l'industrie textile du coton. La consommation de coton brut s'élève à 14,500,000 livres contre 12,300,000 le mois précédent. Au cours des dix premiers mois de cette année il s'ouvre 309,539 balles, à rapprocher de 320,878 la période correspondante de 1944.

Les recettes brutes du chemin de fer Pacifique Canadien se chiffrent par \$271,400,000 les dix premiers mois, comparativement à \$272,400,000 la même période de l'an dernier, diminution de 0.34 p.c. Les recettes brutes des Chemins de fer Nationaux du Canada s'établissent à \$289,300,000 les deux premiers mois, au regard de \$290,000,000 la même période de l'année précédente.
